1Password

PROFILE

Technical professional with software development, systems integration, project management, and client-support experience. One of two developers supporting and evolving a tax-integration platform that connects e-commerce, ERP, billing, payment, and financial systems with leading tax providers. Skilled in Python, Django, cloud infrastructure, CI/CD, and translating client requirements into practical technical solutions.

EXPERIENCE

Software Development Manager

May 2020–Present

DSTax Technologies

Warrenville, IL

Lead developer responsible for building, supporting, and improving a tax-integration platform.

- Develop integrations among e-commerce, ERP, billing, payment, and financial platforms including Acumatica, Chargebee, Sage, Braintree, Magento/Adobe Commerce, WooCommerce, Stripe, and QuickBooks and tax providers including Thomson Reuters, Vertex, Sovos, and SureTax.
- Expanded the platform's integration capabilities and improved integration performance and reliability.
- Led the transition from the V1 to V2 product, broadening tax-provider support and coordinating migration of production workloads to AWS.
- Built and maintained GitLab CI/CD pipelines to improve consistency and efficiency of software deployments.
- Designed and automated client-onboarding workflows, reducing manual work and improving operational efficiency.
- Partnered with clients and internal stakeholders to gather requirements, troubleshoot technical issues, and design custom solutions.
- Implemented Jira for project and ticket management across development and executive teams and consolidated team documentation in Confluence.
- Strengthened development-team security practices by introducing 1Password for password management.
- Served as Lead Developer and Project Manager from 2022 to 2026 and trained a developer intern in 2023.

Warehouse Associate

Jun 2019–May 2020

Colectivo Coffee Roasters

Milwaukee, WI

- Weighed and packaged roasted coffee and tea and fulfilled orders for more than 300 restaurant customers.
- Updated invoices for inventory changes to help maintain accurate records.
- Partnered with the IT department to install and troubleshoot new point-of-sale nodes.
- Assisted with training new warehouse hires in 2020.

Facilities Management Intern
Komatsu Mining Corp. (Joy Global)

May 2016–Dec 2018

Milwaukee, WI

- Analyzed asset and facilities databases, identifying more than \$10 million in previously unidentified asset value that informed the sale of unused assets before Komatsu's acquisition of Joy Global.
- Evaluated, selected, and implemented a global mapping platform that provided facility information to employees and customers.
- Initiated web automations that reduced manual database-maintenance work.
- Managed SharePoint sites and data and designed data-input forms to improve accessibility, reduce errors, and promote cross-department information sharing.
