OBJECTIVE

Technical professional with software development, systems integration, project management, and client-support experience, including migration of production workloads from DigitalOcean to AWS. Builds and supports software platforms, improves application performance, and coordinates implementation work from requirements gathering through go-live support. Earlier experience includes platform implementation, web automation, SharePoint administration, and operational data analysis.

EXPERIENCE

Manager

DSTax Technologies

May 2020–Present

Warrenville, IL

Manager serving as a technical lead and lead developer for a tax-integration platform, with responsibilities spanning integration development, project coordination, client support, troubleshooting, implementation assistance, and documentation.

- Migrated production workloads from DigitalOcean to AWS.
- Served as Lead Developer and Project Manager.
- Led the transition from Version 1 to Version 2 of the tax-integration platform.
- Optimized asynchronous operations to improve performance and throughput.
- Managed internal development projects and client-coordinated work, sharing integration updates, reporting status, and responding to questions and requests.
- Supported end-to-end integration implementations, including requirements gathering, setup, troubleshooting, and go-live support.
- Develop integrations between financial platforms and tax providers.
- Supported integrations with Acumatica, Chargebee, Sage Intacct, WooCommerce, Magento/Adobe Commerce, Thomson Reuters, Vertex, Sovos, and SureTax.
- Broadened tax-provider and financial-platform support.
- Improved UI/UX.
- Created and maintained client integration guides and knowledge-base articles.

Warehouse Associate

Colectivo Coffee Roasters

Jun 2019–May 2020

Milwaukee, WI

- Partnered with the IT department to install and troubleshoot new point-of-sale nodes.
- Fulfilled orders for more than 1000 restaurant and store clients.
- Updated invoices for inventory changes to help maintain accurate records.
- Assisted with training new hires

Facilities Management Intern

Komatsu Mining Corp. (Joy Global)

May 2016–Dec 2018

Milwaukee, WI

- Evaluated, selected, and implemented a global mapping platform that provided facility information to employees and customers.
- Initiated web automations that reduced manual database-maintenance work.
- Managed SharePoint sites and data and designed data-input forms to improve accessibility, reduce errors, and promote cross-department information sharing.
- Analyzed asset and facilities databases, identifying more than \$10 million in previously unidentified asset value that informed the sale of unused assets before Komatsu's acquisition of Joy Global.

EDUCATION

University of Wisconsin–Milwaukee

BBA, Information Technology Management
2017–2020

Milwaukee School of Engineering
