BBA, Information Technology Management
2017–2020

Milwaukee School of Engineering

Studied, Industrial Engineering and Supply Chain/Operations Management
2014–2016

SKILLS

Cloud, Infrastructure & DevOps

AWS Docker NGINX
GitLab CI/CD DigitalOcean

Software Development

Python Django Flask C#

Integrations & APIs

REST APIs

Databases

Microsoft SQL Server
PostgreSQL SQLite

Source Control & Collaboration

Git GitLab SharePoint
Microsoft 365 Enterprise

OBJECTIVE

Technical professional with experience developing and supporting software platforms, migrating production workloads to AWS, and coordinating integration implementations. Combines technical leadership, application troubleshooting, and documentation with skills in Docker, NGINX, and GitLab CI/CD.

EXPERIENCE

Manager

May 2020–Present

DSTax Technologies

Warrenville, IL

Technical lead and lead developer for a tax-integration platform, with responsibilities spanning development, project coordination, client support, troubleshooting, and documentation.

- Migrated production workloads from DigitalOcean to AWS.
- Led the transition from Version 1 to Version 2 of the tax-integration platform.
- Optimized asynchronous operations to improve performance and throughput.
- Managed internal development projects and client-coordinated work, sharing integration updates and reporting status.
- Supported end-to-end integration implementations, including requirements gathering, setup, troubleshooting, and go-live support.
- Developed integrations between financial platforms and tax providers, broadening platform and provider support.
- Created and maintained client integration guides and knowledge-base articles.

Warehouse Associate

Jun 2019–May 2020

Colectivo Coffee Roasters

Milwaukee, WI

- Partnered with the IT department to install and troubleshoot new point-of-sale nodes.
- Fulfilled orders for more than 1000 restaurant and store clients.

Facilities Management Intern

May 2016–Dec 2018

Komatsu Mining Corp. (Joy Global)

Milwaukee, WI

- Evaluated, selected, and implemented a global mapping platform that provided facility information to employees and customers.
- Initiated web automations that reduced manual database-maintenance work.
- Managed SharePoint sites and data and designed data-input forms to improve accessibility, reduce errors, and promote cross-department information sharing.
